### HOW TO READ THE RATINGS

Business schools in each category have been placed in an alphabetical order. That is why, in the Super League 1, Indian Institute of Management, Ahmedabad, is on top and XLRI, Jamshedpur is at the bottom, although on the basis of the overall score, it could be the other way round. Similarly, in other categories, this could have resulted in business schools with a lower overall score to be listed above those with a higher overall score.

The survey for the rankings uses a combination approach, merging the best of both worlds – self-audit by the institutes, and an external rating by industry. The audit module, itself, has been refreshed to take into account the changing dynamics of the market, as in each parameter has been relooked at and evaluated to making make it more relevant.

The scores given in the table represent percentile scores. Scores have been allotted on two broad parameters:

- Audit scores under six parameters
- Perception scores

Each parameter has been assigned a different weight according to the directions of an expert committee. The final score is therefore a weighted aggregate and not a simple aggregate. The final scores are used to put the business schools in different categories. No mathematical operations like addition or subtraction can be done on these scores.

The grouping in each category is on the basis of absolute scores and not percentile scores. That is why, you will find, that business schools with a score of 75 are in the Super League 2 as well as in the A1 category. Similarly, business schools with an overall score of 65 can be found in the A2, A3, A4, A5 and A6 categories.
